

ARCHITECTURAL BAR GRILLES

**SOLUTIONS THAT LET THE AIR FLOW,
AND FLOW WITH THE DESIGN OF YOUR SPACE.**

Crafting architectural bar grilles is equal parts art and science, requiring close communication between the customer and the manufacturer. Whether floor, sill, wall or ceiling mounted, bar grilles complement the visual flow of the space while evenly moving supply, return or exhaust air. Their ultra-clean, modern appearance can be found under large windows in lobbies and offices, on radiator cabinets, or in walls and ceilings. Our skilled engineers and craftsmen can deliver straight, curved, mitered or special shapes to bring your vision to life.

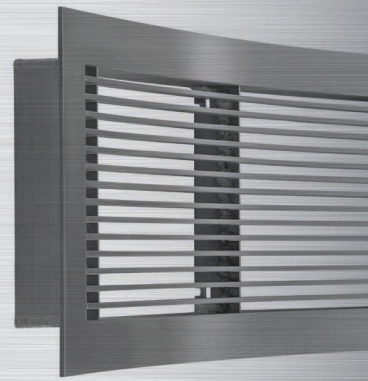

ARCHITECTURAL BAR GRILLES

ARCHITECTURAL BAR GRILLES

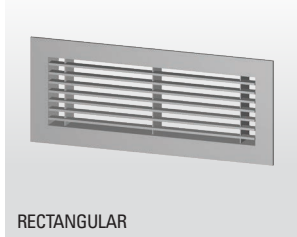

HIGH-QUALITY BAR GRILLES DESIGNED FOR EXACTLY WHAT YOU NEED.

- All-welded construction maximizes strength and enables larger single-section fabrications.
- Many shapes are available for creative flexibility.
- Incremental sizing down to .001" for a perfect fit and finish.
- Reduce installation time and cost with single-piece bar grilles up to 96" x 48"—the largest in the industry.
- Rely on decades of engineering and design expertise to bring your vision to life.

YALE UNIVERSITY SCHOOL OF MANAGEMENT

required custom bar grilles to follow the undulating curves of massive windows designed by renowned architectural firm Foster & Partners. Through careful design collaboration, KEES fabricated stainless steel bar grilles that nest perfectly along the base of the windows, complete with circular cutouts for the cylindrical columns.
