

DROP BOX DIFFUSERS

IMPRESSIVE STANDARD SOLUTIONS,
WITH BUILT-IN FLEXIBILITY.

KEES simplifies air distribution with drop box diffusers. Our single-point systems effectively distribute air in multiple directions without the need for ductwork. KEES offers a myriad of product options to fit virtually any building type or size, including stainless steel for harsh or humid environments. These durable, high-quality drop boxes are ideal for expansive spaces such as warehouses, food processing and manufacturing facilities, sports arenas, shopping centers and other large-scale retail spaces.

DROP BOX DIFFUSERS

DROP BOX DIFFUSERS

AGILE MANUFACTURING TO DELIVER ANY DESIGN.

- Complete design flexibility with multiple throw patterns, drum louvers or bladed grilles and numerous insulation and drain pan options.
- Choose from an extensive list of standard sizes or provide custom dimensions to meet any performance or clearance requirement.
- Withstand harsh, wet environments with optional stainless steel construction and continuously welded seams.
- Access BIM/REVIT files anytime/anywhere for incorporation into your plans.

Choose 3-, 4- or 6-way throw patterns, or work with us to design a custom drop box diffuser solution.
