

HEAVY-DUTY BAR GRILLES

LEAN ON US FOR RUGGED SOLUTIONS
IN HIGH-TRAFFIC ENVIRONMENTS.

Every day, grilles take a beating. That's why our heavy-duty solutions are ideally suited for gymnasiums, factories, warehouses, parking garages and more. Heavy-gauge materials, more support bars, all-welded construction and fully captured blades ensure they can handle crushing foot traffic, a wildly passed basketball, or a brush with a forklift. Our single-piece solution—up to 96" x 48"—is the largest in the industry, simplifying installation to save time and money. Whether rectangular, round or any custom shape, KEES will work with you to design the optimal solution.

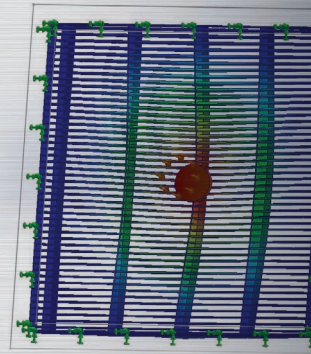

HEAVY-DUTY BAR GRILLES

HEAVY-DUTY BAR GRILLES

SHOW US YOUR REQUIREMENTS. WE'LL FIND A SOLUTION.

- Ensure maximum strength and safety with fully captured blades, all-welded construction and heavier materials than competitors use.
- Reduce installation time and cost with single-piece bar grilles up to 96" x 48"—the largest in the industry.
- Get the ultimate design flexibility with a variety of shapes, sizes and finishes.
- Our custom sizing ensures a perfect fit. No size is too large and every size can be specified down to .001".
- Configure your grille by selecting from three blade deflections, a custom flange length, a hinged subframe or a filter frame.

Impact Resistance Modeling
Computer modeling confirms the design will meet the expected performance.

CONSTRUCTION OPTIONS

GRILLE SHAPES

RECTANGULAR

ROUND

CUSTOM

MATERIALS

- Steel
- Aluminum
- Stainless steel
- Various metal gauges to meet size and strength requirements

BAR WIDTH & CONFIGURATION

- 1/8" thick bars on various centers
- Fully captured bars and overlapping face flange
- 0, 15, or 40 degree blade deflection

FINISHES

- Painted—standard and custom colors
- Anodized
- Satin polish

FRAME & MOUNTING OPTIONS

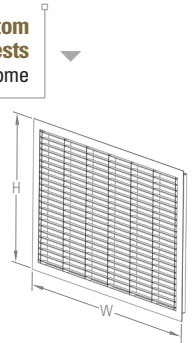

- Flanged or flat frame
- Face or concealed mounting
- Fixed, hinged or removable core
- Filter holding frame

SIZE

- Single piece up to 96" x 48"
- Combine multiple sections for unlimited sizing

Custom requests are welcome

Tell us what you have in mind

NORTH OGDEN JUNIOR HIGH SCHOOL, Utah, had big plans for the renovation of its aging athletic facility which included moving lots of air through it. Triangular return air chases were chosen to take advantage of two large unused spaces. However, 7'3" tall by 7'3" wide triangular grilles aren't found on the shelf. A resourceful HVAC rep knew where to find custom heavy-duty grilles. KEES took on the tall order and provided a perfect fit.
