

LOUVERS & PENTHOUSES

VENTILATION WITH A SENSE OF STYLE.

KEES wall-mounted louvers and roof-mounted penthouses provide excellent protection against the elements, and are designed to work with the aesthetic qualities of your building. With a variety of material and finish options including stainless steel, your building will get the ventilation performance required without compromising style. Whether you select a standard design or custom solution, no size is too large. KEES has the flexibility to add welded seams and structural supports for sizes our competitors avoid.

PENTHOUSES

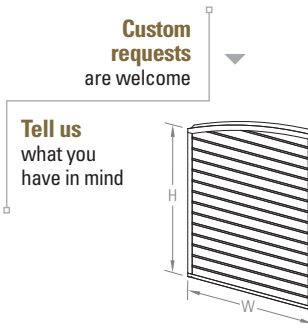

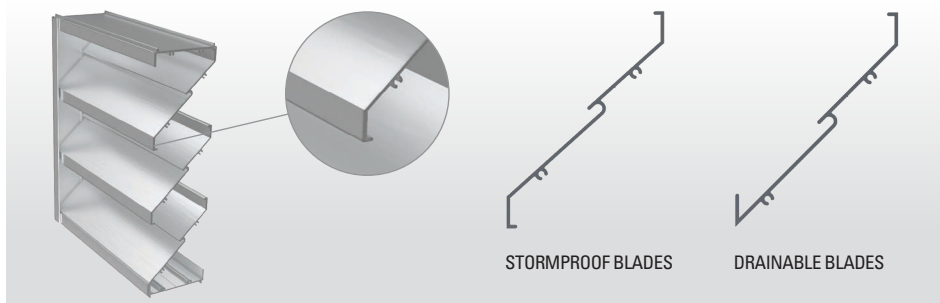

## WE HELP BUILDINGS BREATHE—AND YOU TO BREATHE EASIER.

- Heavy-gauge materials ensure damage protection while stainless steel helps with corrosion resistance.
- Delivered fully assembled to save time and cost, and to eliminate potential field issues due to improper assembly or weatherproofing.
- Select standard products or design your custom solution.
- Our custom sizing ensures a perfect fit. No size is too large and every size can be specified down to .001".

### CONSTRUCTION OPTIONS

#### BLADE CONFIGURATIONS

#### SCREEN OPTIONS

- Bird screen
- Insect screen
- Removable frame for easy cleaning and screen replacement

**MALCOLM X CITY COLLEGE, CHICAGO**, came to KEES with a big request. They needed enormous, aluminum louvered penthouses built and shipped in one piece. No one is better suited for this than KEES. What we started, a crane finished as it lifted and placed the penthouses directly atop the building. No assembly required. Built to legendary KEES quality, we expect them to help that building breathe better for decades.

### LOUVERS
