

ROOF & WEATHER HOODS

UNSURPASSED PROTECTION.
UNRESTRICTED VENTILATION.

Snow and ice. Rain and hail. Birds and insects. Your air intake and exhaust hood may be out of sight, but what they go through should never be out of mind. Our ventilation solutions can handle everything, in any application. The heavy-gauge construction, structural ribbing, and welded seams all come fully assembled from KEES so both you and your building will breathe easier.

ROOF HOODS

WEATHER HOODS

STANDARD OR CUSTOM. AND NOTHING LESS THAN PERFECTION.

- Hoods are delivered fully assembled to save time and cost, and to eliminate potential field issues due to improper assembly or weatherproofing.
- No size is too large due to the added strength of welded seams and structural ribbing.
- Choose from a variety of materials, including stainless steel for corrosion resistance and heavy gauges for damage-resistant construction.
- Rely on decades of engineering expertise for your standard or custom applications.

CONSTRUCTION OPTIONS

MATERIALS

- Galvanized steel and aluminum
- 304 or 316 stainless steel (for coastal or highly corrosive environments)
- Various metal gauges to meet size and strength requirements

FINISHES

- Mill
- Painted—standard and custom colors
- Satin polish

SIZE

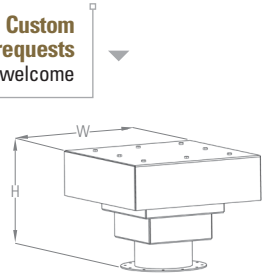

- No limits, we'll build your roof or weather hood to meet any airflow or dimensional requirements

SCREEN OPTIONS

- Bird screen
- Insect screen
- Removable frame for cleaning and screen replacement

Custom requests are welcome

PARTIAL DOWNTURN

FULL DOWNTURN

ROUNDED DOWNTURN

HONDA MOTOR COMPANY relied on the KEES engineering team to design a 17' long roof hood to meet their ventilation requirements. The solution was fabricated from 1/8" thick aluminum in order to withstand the heavy snowfalls in Anna, Ohio. The custom base and curb cap, along with custom gold color, aligns with Honda's reputation for perfect fit and finish.

COVER OPTIONS

- Removable
- Hinged for easy maintenance

OTHER OPTIONS

- Custom curb cap to fit existing curb
- Roof curbs
- Filters (replaceable without removing hood)

MOUNTING OPTIONS

- Flange turned in or out, with optional pre-punched holes
- Through-the-wall sleeve

OTHER OPTIONS

- Balanced lifting lugs for easy installation
- Filters (replaceable without removing hood)
